

Magnetic Contact

Part No. LC-202

Description

Magnetic contact is a proximity switch what is used magnetic field of magnet to actuate Reed Switch. Because of design in Reed Switch, low cost and simple using-way is major characteristics of magnetic contact.

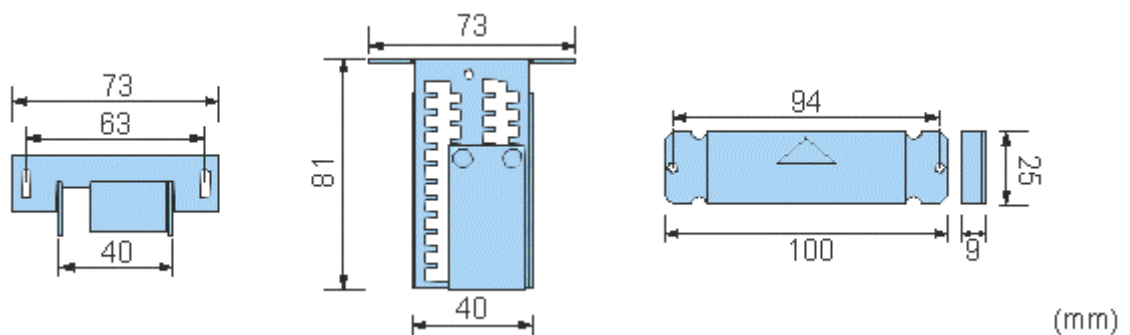

Application

- Security equipment
- domestic appliances
- automation machines

Feature

- Wide gap up to 80mm for roll-up garage door, door top mounting
- Mew designed mounting bracket for digital adjustment

Outline dimensions

Magnetic Contact
Part No. LC-202

Switch

Contact arrangement	Closed loop
Contact material	Rh plating
Contact rating	30V 0.1 A
Contact resistance (Max.)	0.2 Ohm
Life expectancy	10 ⁷ cycles

Magnet

Material	Anisotropic ferrite
Residual flux density (Br)	3300~3600 Gauss
Sense gap	80mm over
